

DAYS 3 & 4

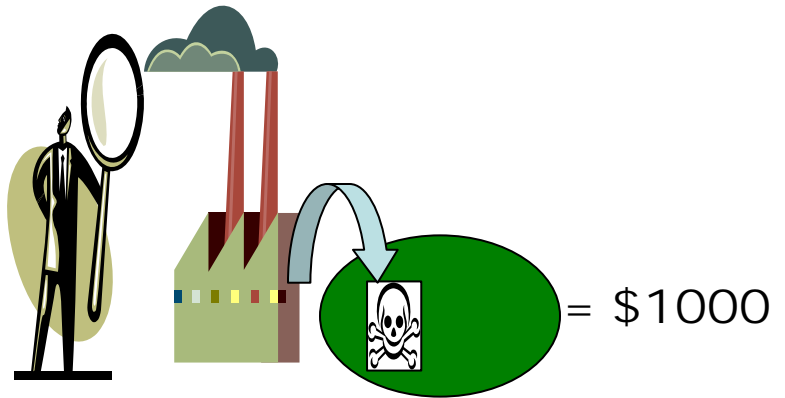

The government has now passed a law to try to stop companies from polluting

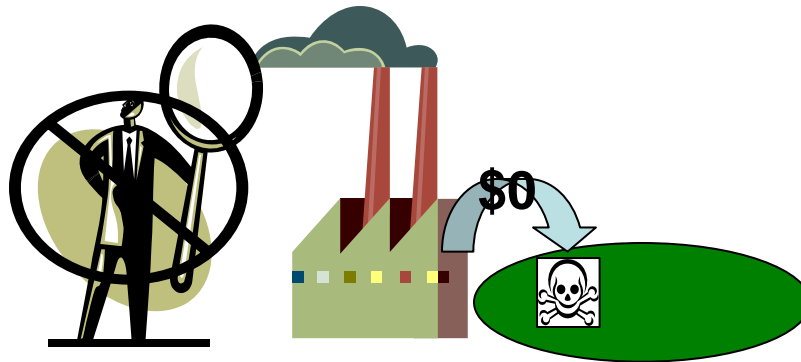

The cost of disposing your waste properly remains the same (\$100),

but each day one company will be picked at random to be inspected to see if they polluted.

If you are caught polluting, the penalty is \$1000, a full day's profit.

But there's a chance you won't get caught polluting, and there is no penalty for polluting if you're not inspected.

**Please decide how you would like to dispose of your waste.**
